

POLITICIANS LIE!

Advertisements by some Democratic candidates claim that their FairTax supporting Republican opponents favor a 10 or 23% tax increase. This is simply false which has been confirmed by FACTCHECK.ORG.

The Michigan and national FairTax proposals are NOT tax increases. They replace all existing Income, Capital Gains, and withholding taxes, even the Death Tax.

The truth is that when all the dust settles, the average person will pay LESS in TAXES every week, month, and year.

Due to the unique "Prebate" feature, nobody will pay federal or state tax for any expenditure up to the poverty level. That protects lower income earners, and lowers the overall rate for everyone.

Used goods, including large items such as used cars are not federally taxed. This allows the consumer to make tax choices.

Corporate taxes are slashed also. Remember, corporations don't really pay taxes. They just add them on to the cost of production and pass them along to the consumer as higher prices. You pay. They don't.

Cost of goods produced could drop by as much as 22%. That means the U.S. and Michigan in particular will be a business haven. That means JOBS, lots of JOBS, not to mention lower prices and a stronger competitive position for American (especially Michigan Made) goods.

So, think about it. The FAIRTAX attracts jobs and will let you take home your entire paycheck with NO DEDUCTIONS. Isn't that a better way forward for America, for Michigan, and for you? We think so!
